

## Industrial Engineering Trainee (f/m/div)\*

### Job description

Infineon Technologies is a leading semiconductor manufacturing company with a global presence. We are currently seeking a highly motivated and talented individual to join our team as an Industrial Engineering Support Trainee in Cegléd. In this role, you will play a vital part in supporting our line responsible Industrial Engineers in their daily operations, ensuring optimal productivity and efficiency.

In your new role you will:

- **Conduct machine time studies, and method studies** to assess and improve industrial engineering standards and productivity.
- **Collect and analyze data to identify areas for improvement** and provide recommendations to line Industrial Engineers.
- **Assist in photo and video recording for further investigation** and analysis purposes.

### Profile

You are passionate about industrial engineering, possess a strong drive for continuous improvement, and are looking for an exciting opportunity to contribute to a leading semiconductor company. Furthermore, you:

- Are completing a **Bachelor's degree in Electrical Engineering, Mechanical Engineering, Industrial Engineering, Manufacturing Engineering, or Computer Science**.
- Are proficient in **English**, both written and verbal, enabling effective communication within the team and across departments.
- Have strong **knowledge of MS Office suite**, including Word, Excel, and PowerPoint, to create reports, presentations, and data analysis.
- Have **excellent analytical and problem-solving skills** with a keen eye for detail.

Is a plus if you have:

- Proficiency in the **Hungarian** language for effective communication with local stakeholders.
- Familiarity with **Lean principles and methodologies**, with the ability to implement Lean practices to drive process improvements.

Please send us your CV in English.

## Why Us

### **Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
