

"IT'S MY JOB TO PROVIDE THE PROPER DESIGN SOLUTION ACCORDING TO CUSTOMER REQUIREMENTS."

György Bartha, Design Engineer, is responsible for part designing at Diehl Aviation in Hungary.

At Diehl: The future is in your hands!

More than 17,000 employees are currently shaping the engineering of the future in our five Corporate Divisions Metall, Controls, Defence, Aviation and Metering. At Diehl Aviation, an efficient and dedicated network of aviation experts constantly develops and produces the state of the art in avionics systems, cabin elements and cabin lighting – from high-quality composite components, cabin fittings and electronics in commercial aircraft to highly integrated bathrooms and galleys. Apply at Diehl and join hands with fascinating technologies and a unique corporate tradition of stability and trust.

Weight Technician/Engineer (Debrecen)

Your tasks would be:

- Weight management of aircraft interior parts and airducts
- Weight calculation and analysis of weight distribution
- Create customer reports of aircraft components
- Create, develop and optimize specifications
- Working with weight database
- Keep contact with other DIEHL development and manufacturing sites

Requirements of the application:

- Technician qualification
- BA degree or ongoing BA studies is an advantage
- Good communication skills in English or in German
- User-level MS-Office knowledge
- Long-term focus and tolerance to monotony
- Ability to work independently and precisely

Interested? Apply now by uploading your English or German CV through the link below!
